Daily scrum meeting template

Done requirements

Ziad: SendPersonalMessage service

What will be done today

Ziad: I want to help with the jsp pages since my task was almost nothing

Heba: make class diagram by argoUml and will change somethings in the code (add notification ID and change friendRequest table name and add it to the observer design pattern)

Current obstacles

Heba: Forgot that we use ArgoUml to construct the class diagram and downloaded power designer instead
